Ventilator Rehabilitation

Specialists in vitality for a multi-disciplinary approach to ventilator treatment & rehabilitation.

Our dedicated multi-disciplinary teams provide effective therapy programs

Our programs are designed for patients who need short-term or continuous ventilator treatment and rehabilitation. Our ventilator teams are led by Board Certified Pulmonologists who are focused on taking an aggressive, multi-disciplinary approach to ventilator rehabilitation. Our teams' clinical expertise, including specially trained registered nurses, enable them to design an individualized care plan that fits within each patient's respiratory, physical, occupational and speech therapy treatment program. Our team includes:

- Board certified pulmonologists
- Specially trained registered nurses
- Respiratory care practitioners
- Certified nursing assistants with advanced ventilator rehabilitation training
- Full-time registered dietitians
- Physical, speech and occupational therapists
- Recreation services
- Social services

Pulmonary Management

Choosing a program to help manage pulmonary disease is a complicated decision. It's important to choose a health care provider that gets you home safely, rather than a provider that's simply closer to home. At Genesis HealthCare, we have expertise in the management of chronic and acute respiratory conditions that may benefit from ventilator services, including:

- Moderate to severe COPD
- Asthma
- Restrictive Lung Disease
- Pneumonia
- Chronic Bronchitis
- Emphysema

Designed to meet individual needs

Our programs are designed to provide optimum care and help improve function on a patient-by-patient basis. Whether the needs are a result of injury, neurological disorders or pulmonary disease, Genesis provides exceptional comfort while reducing or eliminating ventilator dependence.

Amenities created to help improve patient progress

Genesis Ventilator units offer comforts and amenities that can make a tremendous difference in a patient's overall experience.

- 24/7 respiratory therapists in our units
- Private and semi-private rooms
- Pulmonologists have remote access to digital x-rays
- Laboratory results available 24 hours a day
- Piped in oxygen
- Step down beds for Trach, Cpap and Bipap patients
- Telephones in rooms
- Beautiful courtyard and surroundings
- Recreational activities designed specifically for our ventilator patients
- Comprehensive discharge program with an emphasis on teaching programs to educate patients and families
